 Venue : Government Girls Higher Secondary School, Thondi.
 No. of beneficiaries: 100

Dengue viruses are spread to people through the bite of an infected *Aedes* species mosquito. Almost half of the world's population, about 4 billion people, live in areas with a risk of dengue. With a view to combat the dangerous and deadly disease dengue, our Red Ribbon Club arranged a "Dengue Prevention Campaign/Awareness Campaign". The most effective way to get rid of dengue is awareness among the school students. All the students and respected teachers willingly participated with much enthusiasm. We all joined our arms against the fear of dengue. Our staff Mrs.S.Jothi guided the students and our RRC student K.Jothika, II M.sc biochemistry gave awareness message to the school students by power point presentation. K.Ashikabarveen, II B.sc biochemistry described about the preventive measures relating to how to tackle the disease. The powerpoint presentation was about the deadly disease dengue, how it spreads, its preventive measures, etc.

They asserted that people have necessity to be aware of the mosquito – breeding. Our department staff also urged the students to make sure that there is no water stagnation around surrounding areas. Some students also delivered speech about dengue.

Thus, the campaign aimed at preventing water stagnation and removing mosquito-breeding grounds. This campaign encouraged the school students and the staff of the school, created a great enthusiasm among them.

To create awareness among people about their responsibilities towards nature and the earth at large. On **13.01.2023** the Rotaract went to **Susaiyappar Pattinam** to save the environment from the harmful effects of Plastics.

We totally **52 members with 6 staff** went and talked to those school children. As plastic bags pollute our land and water. We insisted them to use reusable bags. We asked them to use silver boxes and containers instead of plastic bottles. We have shown them the serious health issues caused by the harmful gas produced by burning plastics. The students eagerly received our words and accepted the fact. Finally they took a decision not to use plastic things.
