QUESTION PAPER

Q

Q.1. The following information is given for the company ABC Ltd. for the year ended 31st March 2019.

Q.2. The following information is given for the company ABC Ltd. for the year ended 31st March 2019.

Q.3. The following information is given for the company ABC Ltd. for the year ended 31st March 2019.

Q.4. The following information is given for the company ABC Ltd. for the year ended 31st March 2019.

Q.5. The following information is given for the company ABC Ltd. for the year ended 31st March 2019.

Q.6. The following information is given for the company ABC Ltd. for the year ended 31st March 2019.

Q.7. The following information is given for the company ABC Ltd. for the year ended 31st March 2019.

Q.8. The following information is given for the company ABC Ltd. for the year ended 31st March 2019.

Q.9. The following information is given for the company ABC Ltd. for the year ended 31st March 2019.

Q.10. The following information is given for the company ABC Ltd. for the year ended 31st March 2019.

1. Answer any five questions out of the following.
2. Find the value of x if $\sin^{-1}(\sin x) = \frac{\pi}{6}$, where x lies in the interval $(-\frac{\pi}{2}, \frac{\pi}{2})$.
3. Find the value of $\sin^{-1}(\sin \frac{5\pi}{6})$.
4. If $\sin^{-1}(\sin x) = \frac{\pi}{6}$, find the value of $\cos^{-1}(\cos x)$.
5. Find the value of $\sin^{-1}(\sin \frac{7\pi}{6})$.
6. Find the value of $\sin^{-1}(\sin \frac{11\pi}{6})$.
7. Find the value of $\sin^{-1}(\sin \frac{13\pi}{6})$.
8. Find the value of $\sin^{-1}(\sin \frac{15\pi}{6})$.
9. Find the value of $\sin^{-1}(\sin \frac{17\pi}{6})$.
10. Find the value of $\sin^{-1}(\sin \frac{19\pi}{6})$.

The effect of the assessment is to evaluate the student's ability to solve problems involving the inverse trigonometric functions. The student has to show his/her understanding of the concept of the inverse trigonometric functions.

The effect of the assessment is to evaluate the student's ability to solve problems involving the inverse trigonometric functions.

The effect of the assessment is to evaluate the student's ability to solve problems involving the inverse trigonometric functions.

1. $\sin^{-1}(\sin x) = \frac{\pi}{6}$

2. $\sin^{-1}(\sin \frac{5\pi}{6})$

3. $\sin^{-1}(\sin \frac{7\pi}{6})$

4. $\sin^{-1}(\sin \frac{11\pi}{6})$

5. $\sin^{-1}(\sin \frac{13\pi}{6})$

6. $\sin^{-1}(\sin \frac{15\pi}{6})$

7. $\sin^{-1}(\sin \frac{17\pi}{6})$

8. $\sin^{-1}(\sin \frac{19\pi}{6})$

9. $\sin^{-1}(\sin \frac{21\pi}{6})$

10. $\sin^{-1}(\sin \frac{23\pi}{6})$

4. Write with full supporting calculations the value of T (using the given formula) and the maximum value for T given the conditions.

5. Find the maximum rate of profit (the maximum in the positive production) for each production.

6. A firm's profit function is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

7. A firm's profit function is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

8. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

9. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

10. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

11. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

12. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

The value of the maximum profit is given by $P(x)$ at the value of x which gives the maximum profit. The value of the maximum profit is given by $P(x)$ at the value of x which gives the maximum profit.

The value of the maximum profit is given by $P(x)$ at the value of x which gives the maximum profit.

13. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

14. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

15. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

16. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

17. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

18. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

19. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

20. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

21. The profit function for a firm is given by $P(x) = 100x - 0.005x^2$, where x is the number of units produced. Find the maximum profit and the corresponding output.

Dear Sir,

I am pleased to inform you that your application for admission to the 12th Certificate in Financial Mathematics programme has been approved. We are pleased to accept you as the first student in the Department of Financial Mathematics.

Ms. N. S. Ganesan, Manager of M&M Finance is pleased to inform you that you have been accepted for admission to the 12th Certificate in Financial Mathematics programme. The programme is provided by the Faculty of Financial Mathematics at M&M Finance. The programme is designed to provide students with a solid foundation in financial mathematics and to prepare them for a career in the financial industry.

It is our hope that you will find the programme interesting and challenging. We are confident that you will gain valuable knowledge and skills from the programme and will be well-prepared to enter the financial industry upon completion.

Yours faithfully,
Mr. N. S. Ganesan, Manager of M&M Finance

**PHYSICS****TERIYA COLLEGE FOR WOMEN**

WOMEN EMPOWERMENT THROUGH EDUCATION
 Applied Science and Technology Degree Course
 MEDANAGALA, MYSURU - 577101, KARNATAKA - 577101

Date: 19.03.2020

Subject: Physics (L2)

Q1

- 1. Define the term 'work done'.
- 2. Write the SI unit of work.
- 3. Give the mathematical definition of work.
- 4. Explain.
- 5. Write the formula.

Q2 (10)

1000 Joules of work is done in moving a body of 20 kg.

What is the height to which the body is raised? Assume that the acceleration due to gravity is 10 m/s². Is the work done in this process a physical or chemical change?

Solution: Given: Mass (m) = 20 kg, Work done (W) = 1000 J, g = 10 m/s².
 We know that work done (W) = mgh. So, h = W/mg = 1000 / (20 * 10) = 5 m.
 The work done in this process is a physical change because the work done is used to lift the body to a certain height and the work done is not used to change the chemical nature of the body.

Q3 (10) A body of mass 2 kg is moving with a velocity of 10 m/s. Calculate the work done in stopping it. Is the work done in this process a physical or chemical change?

Solution: Given: Mass (m) = 2 kg, Velocity (v) = 10 m/s.

1. The work done in stopping the body is 100 J.
2. The work done in this process is a physical change because the work done is used to stop the body and the work done is not used to change the chemical nature of the body.
3. The work done in this process is a physical change because the work done is used to stop the body and the work done is not used to change the chemical nature of the body.

1. Following are the activities to be carried out
2. Need to understand the ability to work in a group and the value of the 40% projects to be done
3. Need to arrange all papers not allowed in the same envelope to put projects.
4. As it is a group activity, one may be asked to do the activity for 20% to 30% of the total marks.
5. There are various activities to be done in the same group.
6. When you are asked to do the activity, you should not do it in the same way as you do it.
7. The first to make a copy of the project is to be done in the 20% of the total marks.
8. The next to do the project is to be done in the 20% of the total marks.

7

9. The first to make a copy of the project is to be done in the 20% of the total marks.
10. The next to do the project is to be done in the 20% of the total marks.

From 20% to 30% of the total marks is to be done in the 20% of the total marks.

The 20% of the total marks is to be done in the 20% of the total marks. The 20% of the total marks is to be done in the 20% of the total marks. The 20% of the total marks is to be done in the 20% of the total marks.

The 20% of the total marks is to be done in the 20% of the total marks.

- | | |
|-------------------------|-------------------------|
| 1. Project Report - 20% | 1. Project Report - 20% |
| 2. Project Report - 20% | 2. Project Report - 20% |
| 3. Project Report - 20% | 3. Project Report - 20% |
| 4. Project Report - 20% | 4. Project Report - 20% |

Assignment Instructions

The purpose of this assignment is to assess your understanding of the concepts discussed in the lecture and to evaluate your ability to apply these concepts to a real-world scenario.

Instructions:

- Read the scenario carefully and identify the key elements of the case.
- Apply the concepts discussed in the lecture to the scenario and provide a detailed analysis of the situation.
- Support your analysis with relevant evidence and examples.
- Present your findings in a clear and concise manner.

Submission:

- Submit your assignment as a PDF file.
- Use the following filename: `StudentID_AssignmentInstructions`
- Upload your assignment to the designated submission link.

Grading:

- Your assignment will be graded based on the following criteria:
- Understanding of concepts (40%)
- Application of concepts (30%)
- Analysis and evaluation (20%)
- Clarity and organization (10%)

Support:

- If you have any questions, please contact your instructor.
- Additional resources are available in the course materials.

Contact:

For more information, please contact your instructor at instructor@bibiana.edu.
